E. O. HALL & SON, Ltd.

For the Merchant Who Looks Beneath the Surface

It is not a question of a Power Wagon that will run, but a Power Wagon that is built correctly for commercial service, that will run economically with no extravagant bills of upkeep, that will run year after year until it has earned its cost many times over.

The Grabowsky Car

was designed with a special view to simplifying and lessening the cost of maintenance. Business men who have examined it, watched it in operation, tried it in their own business, pronounce it the first really practical motor car ever built for commercial use.
